

NEW PRODUCT!

FALCON™

54" GEAR DRIVE CIRCULATING FANS

Meet the NEW FALCON™ Fan by Genesys! Built around a standard, off the shelf motor that is coupled to a frame-mounted gear reducer with prop attached. The gear-drive attachment allows the delivery of highly efficient c.f.m's per watt, thrust, and ultimately, wind speed. What's more, the FALCON™ Fan avoids the friction loss and maintenance of worn belts and pulleys known to gradually reduce fan efficiency and performance.

In contrast, most direct-drive circulating fans operate on higher-cost, specially wound motors that may not be readily available when motor replacement becomes necessary, thus increasing down-time and animal discomfort.

*"Sturdy Built" Galvanized Steel Fan Frame
Manufactured & Assembled In-House*

Fan Shaft

Gear Reducer

56C Motor

GEAR DRIVE

No bearings, belts, or tensioners to replace

GEAR DRIVE CIRCULATING FANS

Operates on standard, off the shelf 56C replacement motor

*Variable Speed Drive
Package with all electronics
in one easy-access
panel - Outside the barn!*

LCS (Livestock Comfort System)

- Automated volume and speed control - Solid state phase converting
- Convenient customization for all your facilities
- Dramatic Energy Savings - Lower Peak Demand with the ability to set the maximum power consumed by your system

- “Sturdy Built” Galvanized steel fan frame
Manufactured & assembled in-house
- Minimal fan maintenance:
No bearings, belts, or tensioners to replace
- Lifetime synthetic lubrication:
No quarterly or yearly maintenance
- Available in single or three phase. No soft starters required
- Choice of High Velocity or High Efficiency Fan Model

Fan frame slides securely onto fan mounting arm. Provides easy tilt angle and left to right adjustment at any time

Fan Mounting Brackets with Three-Axis Adjustment available for I-Beams, Round Posts, and Wooden Posts

Falcon™ Fan Compatible
